

# REACH Conformity Declaration

Muehltal, December 2010

Dear customers and partners.

We, REA ELEKTRONIK GMBH, declare, that we are aware and that we met our obligations with regard to the REACH (EU) ordinance no. 1907/2006.

Since the beginning of 2006 REACH is an integrated part of our dangerous goods management system and since the middle of 2006 a firm integrated part in our production process.

Our products are preparations exclusively and not chemical substances in the sense of the REACH ordinance. The obligations, requirements and deadlines as mentioned in REACH are referring exclusively to chemical substances. Since we do not produce chemical substances, nor do we import chemical substances from countries outside the EU, we are considered to be a down stream user and not obliged to registration.

From our suppliers we have received the promise that the chemical substances we apply (also the chemical substances in preparations) have been pre-registered and registered within the registration deadline.

REACH does not provide for communication of the pre-registration numbers within the supplier chain<sup>1</sup>.

We can assure you that also in the future you will receive our products in the proved REA JET quality.

The products that are delivered to you are strictly produced according to the criteria of the "exclusion list for printing inks and related products" from the European Council of producers and importers of paints, printing inks and artists' colours EuPIA - CEPE. The mentioned list excludes the application of poisonous, very poisonous substances, preparations and substances which are known to be carcinogenic, mutagenic or that may impair fertility cat. 1 and 2 (CMR substances) in the production of printing inks, lacquers and related products!

We assure you that none of the in the Candidate List listed SVHC (Substances of Very High Concern) substances are applied in our preparations or applied in our company.

---
