REA JET DOD 2.0
Impressive all the way
The new Generation of Large Character Printing Systems
Determined to further improve our legendary sturdy REA JET DOD large character print heads, we took into consideration two common customer requirements:

1. Doubling of the previous speed potential up to 600 m/min
2. Increased durability due to less wear

→ Mission accomplished!

Technology improved

**High-tech Materials**
New materials for less wear

**REA JET Know How**
Further developed REA JET print head technology

**Production Precision**
Latest production processes allow for highest accuracy
REA JET DOD 2.0 – Control Center

Designed for Global Compatibility
- Sturdy and high-quality stainless steel casing designed for daily work in harsh and rugged industrial environments
- Full Unicode support: all global languages can be printed for companies with international customers
- Support of all True Type Fonts (TTFs): maximum design flexibility for your print texts
- 24 V power supply: for direct integration into machines and systems
- Wide range power supply available: for immediate global use
- XML-based data structure and communication protocol: globally standard for data compatibility
- Integrated VNC-Server: Remote maintenance tool for diagnosis and support
- Ready for Industry 4.0

Get connected
- Power supply: 24 V DC from SELV-Power Supply
- External power adaptor IP67 (100 V – 277 V AC, 50-60 Hz)
- Ethernet interface 100 Mbit/s M12-D-coded for fast data exchange
- Serial interfaces RS232/422
- USB interface
- Protection Class IP65: dust-proof and splash water protected for toughest industrial use when required
- Uniform communication protocol for condition monitoring across multiple devices: allowing user-specific signal processing
- Consistent graphical user interface WYSIWYG: realistic display of print contents
- Integrated webserver: enables print system operation via PC, tablets or smartphone
- Digital I/O interface: freely programmable (e.g. information on filling level)
- 2 print head connection strings: up to 512 nozzles selectable
  Example 1: 16 print heads with 32 nozzles each (512 nozzles fully used)
  Example 2: 8 print heads with 16 nozzles each (128 nozzles of 512 used)
- Product sensor and shaft encoder port
Always good to go! Industrial ink and primer supply units

REA JET offers various ink and primer supplies - the right solution for every customer requirement.

- Highest chemical resistance
- Best mixing performance for inks and primers
- Avoidance of sedimentation
- Greater range through higher filling capacity
- Automatic flushing system
- Automatic or manual operation
- Comprehensive accessories
- Over 500 inks and primers

REA JET TITAN Plattform: A single operating concept for all REA JET technologies

Unlimited operation – Now, everything is easier

**Glove Operation**  
Central push-turn jog-dial knob even for glove operation directly at the production line

**Touch Screen**  
Touch screen for operation directly at the production line

**WLAN Browser Operation**  
Browser operation through mobile devices (PC, tablet, smartphone) via WLAN / WebGui.

**PC Operation**  
Remote control from desktop computer or control stand

**Remote Maintenance**  
Remote maintenance and control available via VNC server

**Keyboard Entry**  
For regularly recurrent extensive text input at the production line – use of international USB keyboards possible
Coding and marking of pipes (steel, plastic etc.)

Marking of aluminum plates

Marking of paper bags

Marking of tread on raw rubber

Coding and marking of shrink hoods

Marking of concrete pipes

Large marking of logos on stacked boards

Coding and marking of sheeting materials
