REACH Conformity Declaration

Mühlta, January 2025

Dear customers and partners,

we, REA ELEKTRONIK GMBH, declare, that we are aware and that we meet our obligations with regard to the REACH (EU) ordinance no. 1907/2006.

Since the beginning of 2006 REACH is an integrated part of our dangerous goods management system and since the middle of 2006 a firm integrated part in our production process.

Our products are preparations exclusively and not chemical substances in the sense of the REACH ordinance. The obligations, requirements and deadlines as mentioned in REACH are referring exclusively to chemical substances. Since we do not produce chemical substances, nor do we import chemical substances from countries outside the EU, we are considered to be a downstream user and not obligated to registration.

From our suppliers we have received the promise that the chemical substances we apply (also the chemical substances in preparations) were registered within the registration deadline.

We can assure you that also in the future you will receive our products in the proved REA JET quality.

We verify regularly the by the ECHA published Candidate List of SVHC substances „Substances of Very High Concern“ on new entries.

For any further questions please contact us directly.

i.V. Moritz Becker
Product Manager Consumables
